

Hello

I'm Bonface Mwongera

Egerton, Kenya

254705123736

bonfacemwongera02@gmail.com

Passionate Computer Science student with practical experience in full-stack web development and a keen interest in cybersecurity. Demonstrated ability to build functional, responsive web applications using modern technologies. Seeking a software development attachment to contribute to real-world projects while enhancing my technical skills in a professional environment.

Skills

Programming Languages: Python, JavaScript, PHP, SQL, HTML5, CSS3 **Web Development:** React (Intermediate Level), Node.js (Basic), REST APIs, Responsive Design, Cross-Browser Compatibility **Databases & Tools:** MySQL, Database Design & Administration, Git, VS Code, XAMPP/WAMP **Areas of Interest:** Web Application Security, Ethical Hacking Fundamentals, Open Source Development, System Architecture

Experience

Dashing Website (E-commerce Platform)

- Developed a fully functional e-commerce platform, "Dashing Website" (<https://dashing-one.vercel.app>), featuring a product catalog, shopping cart, user authentication, and order management system.

- Implemented the frontend using React and TypeScript, ensuring a highly interactive and maintainable user interface.
- Designed a responsive user interface with a mobile-first approach, optimizing user experience across all devices.
- Integrated session management and form validation to enhance security and user experience.

BonnieInfratech Company Website

- Built a responsive, multi-page corporate website for an IT infrastructure company, significantly enhancing their online presence.
- Implemented modern CSS techniques, including Flexbox and Grid for layout, with animations and transitions for improved user experience.
- Utilized vanilla JavaScript for interactive features such as navigation menus, form validation, and dynamic content.
- Optimized website performance through image compression and efficient code structure.

Education

Bachelor of Science in Computer Science Egerton University | Expected Graduation: 2026

Relevant Coursework: Data Structures & Algorithms, Database Systems, Computer Networks, Web Technologies, Software Engineering, Object-Oriented Programming, System Analysis & Design

Academic Projects:

- Database design and implementation for a library management system.
- Network configuration and security simulation projects.
- Algorithm analysis and optimization assignments.

Certifications & Achievements

- Web Development Fundamentals – Self-paced learning completion (2023)
- Database Design – Academic coursework with distinction
- Git Version Control – Practical project implementation

Professional Interests

Development Focus: Full-Stack Web Development, API Integration, Responsive UI/UX Design **Security Interests:** Application Security, Ethical Hacking Principles, Secure Coding Practices **Learning Goals:** Advanced JavaScript Frameworks, Cloud Computing, DevOps Practices
